

Dear Parent(s) of _____,

Your child continues to have difficulty with counting, recognizing and writing numbers to 20. As we near the end of the second trimester we are very concerned with the progress your child is making. In order for your child to learn concepts taught in math: time, money, measurement, addition, subtraction (just to name a few) they need to first learn to count, recognize, and write numbers to at least 60. Our end of the year standard is to do the above to 100. Please practice the above mentioned at home and any other class work that comes home with comments of needing more help. Enclosed is a packet to do at home with basic number writing and counting. Please work on the packet daily and return when finished.

Thank you for your support!
Mrs. Buckhoff & Mrs. Chung
